On the Northeastern coast of Andhra Pradesh, women who process and trade in dried fish have experienced increasing hardships. With the concentration of fish trade at major harbours, women must take long journeys to do business at sites that provide no water source for drinking or washing, no toilets, and no place to rest. In the villages, urbanization and development have reduced available beach drying areas, either through direct encroachment or through erosion caused by altered landscapes. Due to the lack of secure land tenure, women are unable to invest in the maintenance or construction of fish drying infrastructure.

Dried Fish Matters
@DriedFishUM

Check out this short introduction to the new conceptual framework on gender in dried fish value chains by [@Madu_G_](#).

 IUCN_Gender @IUCN_Gender · Nov 11

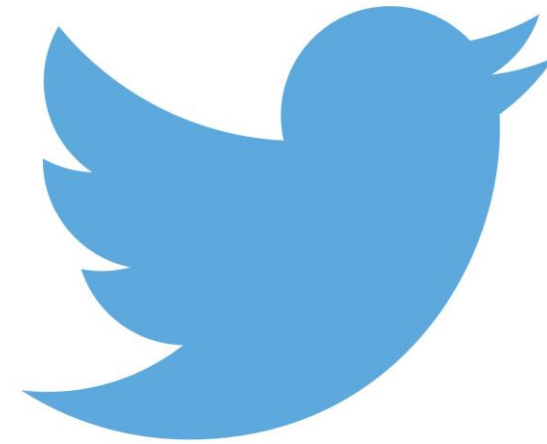

How can we unpack the complexity within dried fish value chain contexts in a way that we develop a 'thick description' of #gender relations?  

@Genderaquafish developed a  conceptual framework to answer this question.

See it here: bit.ly/3nBgob0

Mid-term targets and adjustments

- A shared, publicly accessible **online library** of published or manuscript resources concerning dried fish, including grey literature
- 6 country-level **literature review reports** (20-40 pages each)
- A model **research protocol** for stacked value chain scoping research

Mid-term targets and adjustments

- A **database of field data** from scoping studies
- Shared **codebooks and thematic memos** for dried fish value chains scoping research
- 8 **reports from scoping studies** by Research Teams (50 pages each)
- 4 **thematic reports** from the project Objective Working Groups

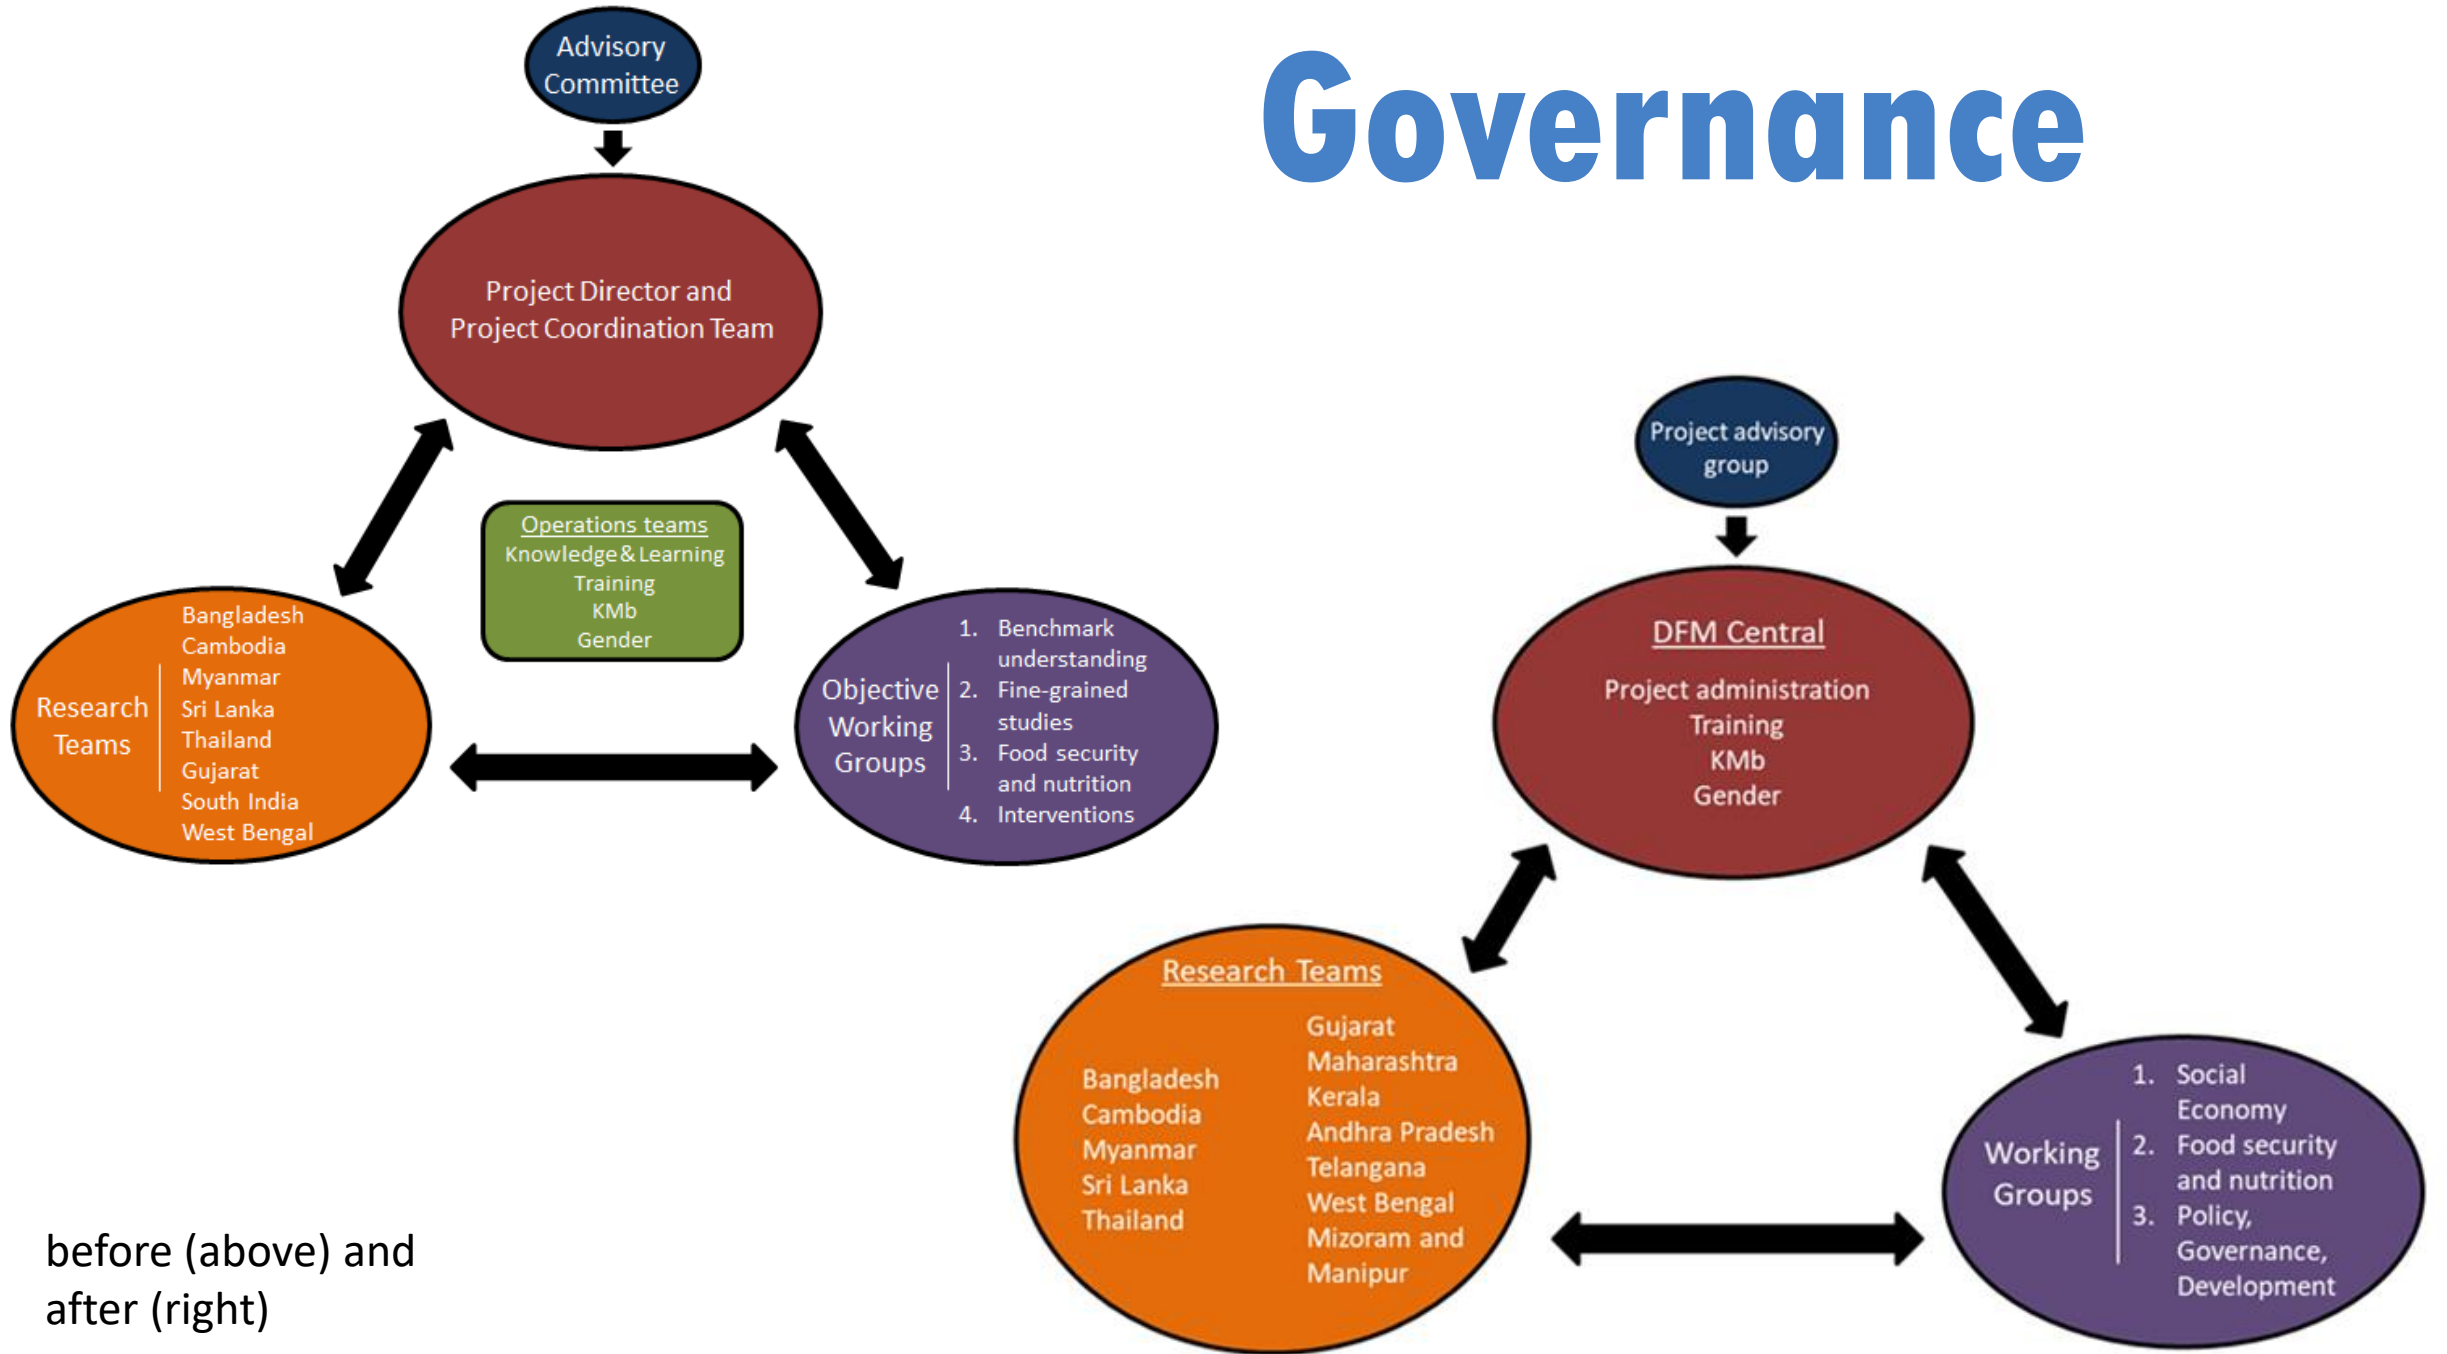

20 Partner Organizations

6 Focus countries

12 Research teams

Scoping phase update

Where do we stand with the Scoping research?

<https://driedfishmatters.org/wiki/Monitoring>

Deliverables*

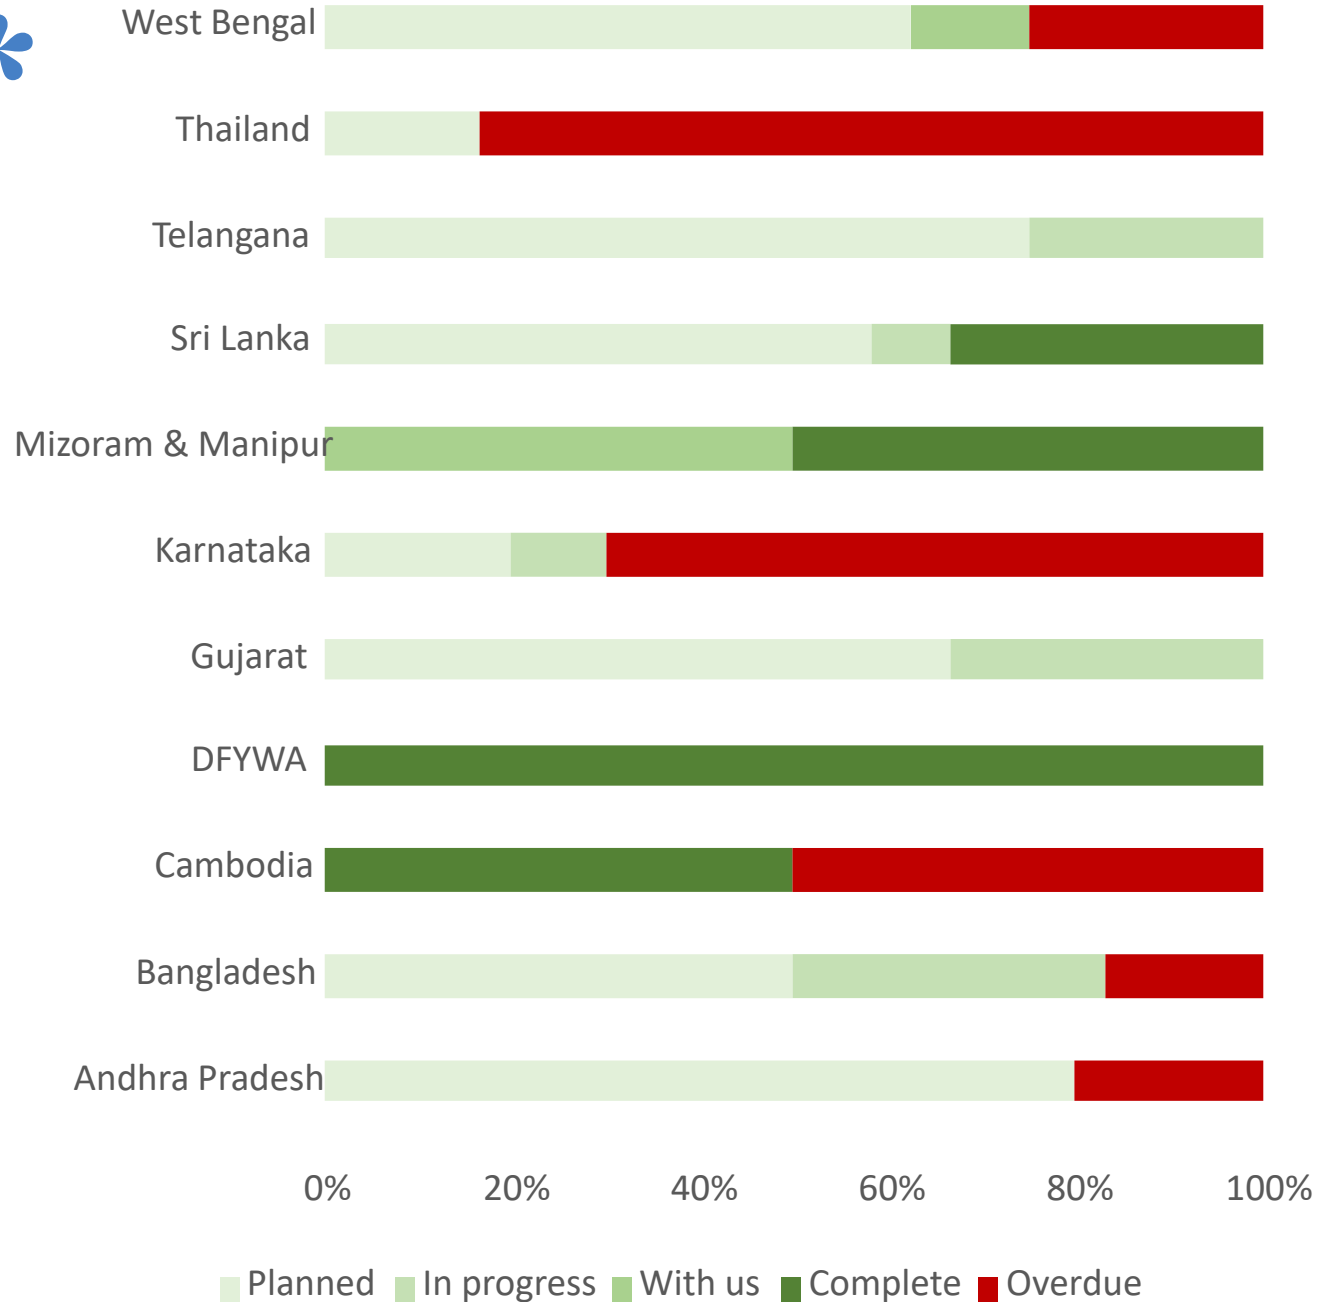

54 planned

18 in progress

5 with DFM
Central

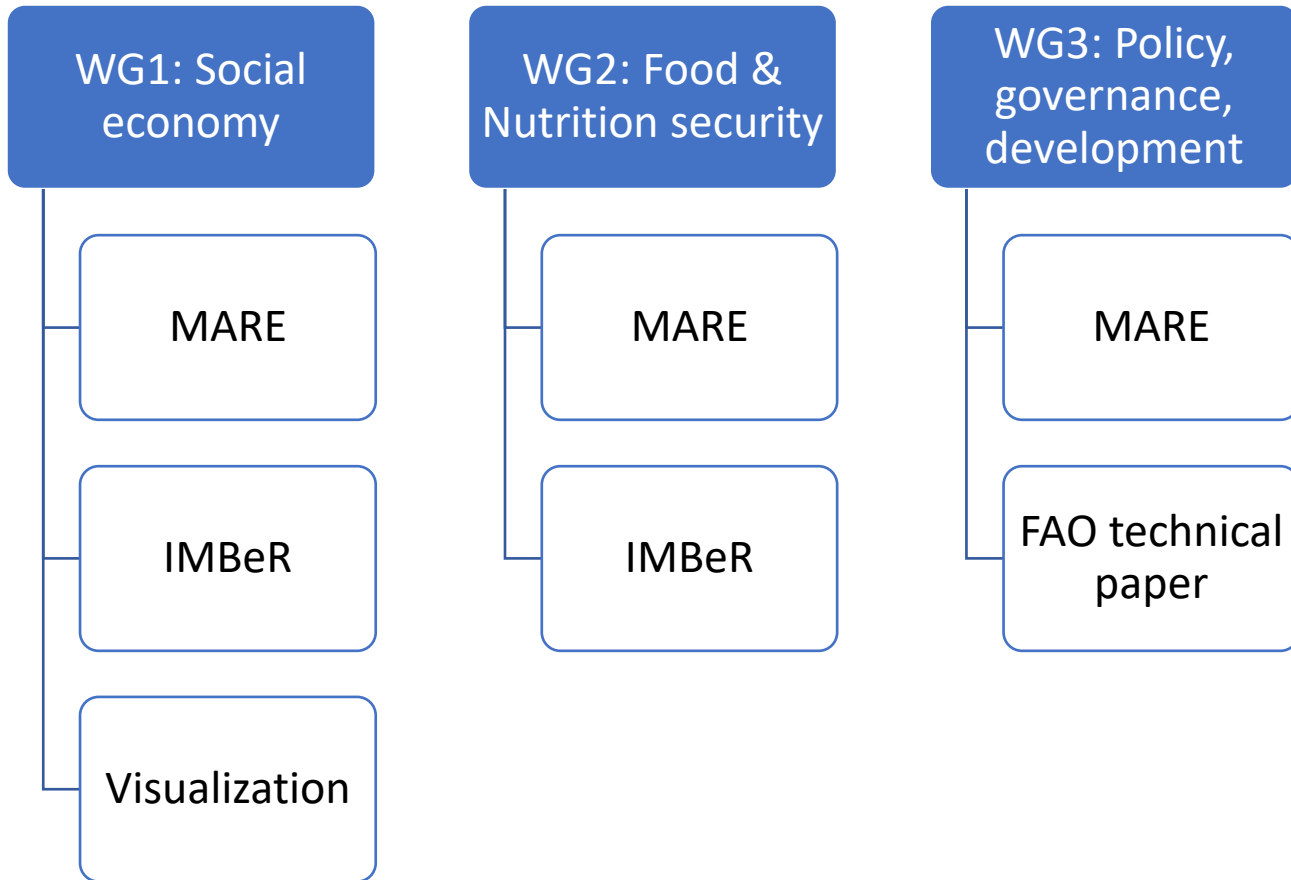

11 complete

27 overdue

*Kerala and Maharashtra not included

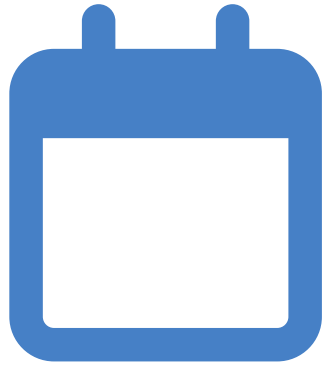

Working Groups

Scoping phase going forward

Activities building on Scoping research

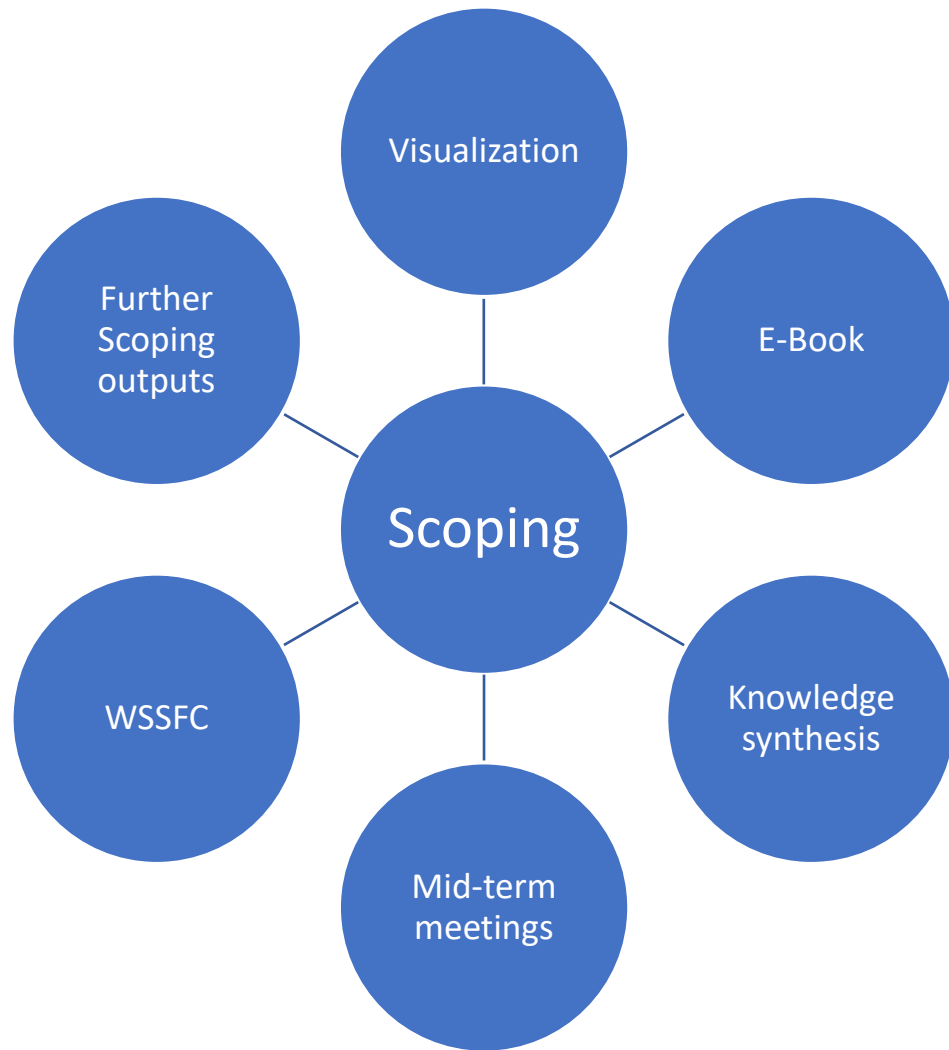

DFM events

Past

- IMBeR Symposium
- TBTI Transdisciplinarity & Co-learning
- SSF Open House
- MARE Conference
- FAO Small Fish Seminar

Upcoming / proposed

- DFM Mid-term meetings
- 4WSSFC (May 10-13)
- E-book launch (June 18)
- Dried fish exhibition
- MARE 2023/2025

Phase 2

- Newly added scoping studies
- **2-3 Stacked Value Chain surveys**
- Student research
- Targeted research projects
- Knowledge dissemination (e.g. visualization)
- **Interventions**

Questions to carry forward to next meeting

Research

- How best to interweave continued and new research in DFM as we move to Phase 2? What practical supports are needed to facilitate continued research?
- Integrative vs. Place-specific outputs, challenges of developing cross-cutting knowledge

Interventions

- What pilot development interventions should we prioritize?
- What other kinds of interventions are we interested to pursue? (e.g. KmB; policy-related)
